

Google Multi-Factor Authentication (MFA)/2-Step Verification

Sign into your Gmail account (.net), and follow the steps below:

In your Google account management page, go to Security, then click on 2-Step Verification.

← 2-Step Verification

Protect your account with 2-Step verification

Prevent hackers from accessing your account with an additional layer of security. When you sign in, 2-Step verification helps make sure your personal information stays private, safe and secure.

 **Security made easy**
In addition to your password, 2-Step verification adds a quick second step to verify that it's you.

 **Use 2-Step verification for all your online accounts**
2-Step verification is a proven way to prevent widespread cyberattacks. Turn it on wherever it's offered to protect all your online accounts.

Available second steps

A second step after entering your password verifies it's you signing in. [Learn more](#)

Note: If you sign in to your Google Account on any eligible phone, Google prompts will be added as another method for 2-Step Verification.

 **Voice or text message (Default)** ⓘ

 Verified

Verification codes are sent by text message.

Add more second steps to verify it's you

Set up additional backup steps so you can sign in even if your other options aren't available.

 **Backup codes**

These printable one-time passcodes allow you to sign in when away from your phone, like when you're traveling.

 **Google prompts**

To receive Google prompts, just sign in to your Google Account on your phone.

After you enter your password on a new device, Google will send a prompt to every phone where you're signed in. Tap any one of them to confirm.

You're not currently signed in on any devices that support prompts.

 **Authenticator app**

Use the Authenticator app to get verification codes at no charge, even when your phone is offline. Available for Android and iPhone.

 **Security Key**

A security key is a verification method that allows you to securely sign in. These

You can either use the Microsoft Authenticator app, or the Google Authenticator.

Google Account

← Authenticator app

Instead of waiting for text messages, get verification codes from an authenticator app. It works even if your phone is off-line.

First, download Google Authenticator from the [Google Play Store](#) or the [iOS App Store](#).

→ [+ Set up authenticator](#)

A screenshot of a mobile application interface. At the top, there is a back arrow and the text 'Authenticator app'. Below this, there is explanatory text about authenticator apps and a link to download Google Authenticator. A button labeled '+ Set up authenticator' is visible. A modal dialog box is overlaid on the screen, titled 'Set up authenticator app'. It contains two bullet points: 'In the Google Authenticator app tap the +' and 'Choose Scan a QR code'. In the center of the dialog is a large QR code. Below the QR code is a link that says 'Can't scan it?'. At the bottom right of the dialog are two buttons: 'Cancel' and 'Next'.
